Import Price Index (2023 = 100) February 2026

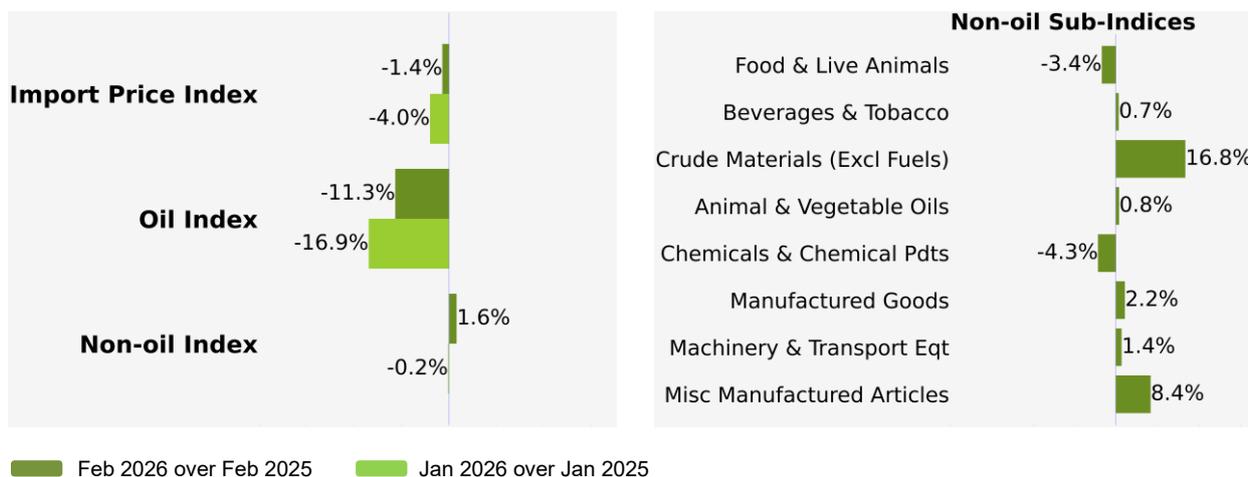

Month-on-Month Change

The Import Price Index rose 1.2% in February 2026, while it was unchanged in January 2026. The Oil index gained 5.0%, mainly due to higher prices of petroleum and products, continuing the 0.1% increase in the previous month. The Non-oil index rose 0.2% in February 2026, while it was unchanged in January 2026.

The increase in the Non-oil index was due to the Machinery & Transport Equipment, Miscellaneous Manufactured Articles, Crude Materials, Animal & Vegetable Oils and Chemicals & Chemical Products indices. The increases were partially offset by decreases in the Manufactured Goods and Beverages & Tobacco indices.

Year-on-Year Change

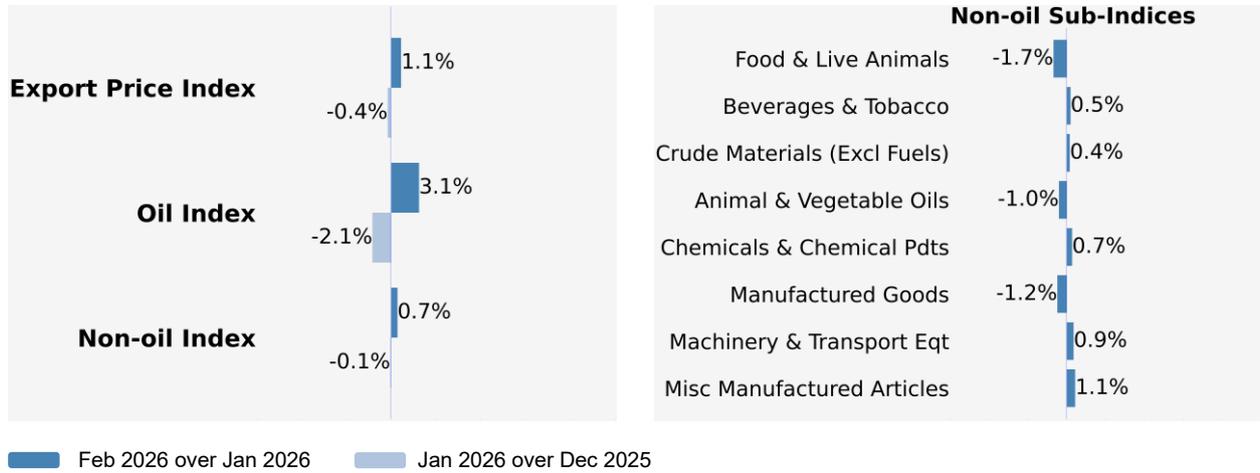

The Import Price Index fell 1.4% in February 2026 from a year ago, following the 4.0% decrease in January 2026. The Oil index dropped 11.3%, mainly due to lower prices of petroleum and products, while the Non-oil index rose 1.6%.

Among the Non-oil sub-indices, increases were due to the Miscellaneous Manufactured Articles index, attributed to higher prices of articles of precious/ semiprecious materials, as well as the Machinery & Transport Equipment, Manufactured Goods, Crude Materials, Beverages & Tobacco and Animal & Vegetable Oils indices. The increases were partially moderated by decreases in the Chemicals & Chemical Products and Food & Live Animals indices.

Export Price Index (2023 = 100) February 2026

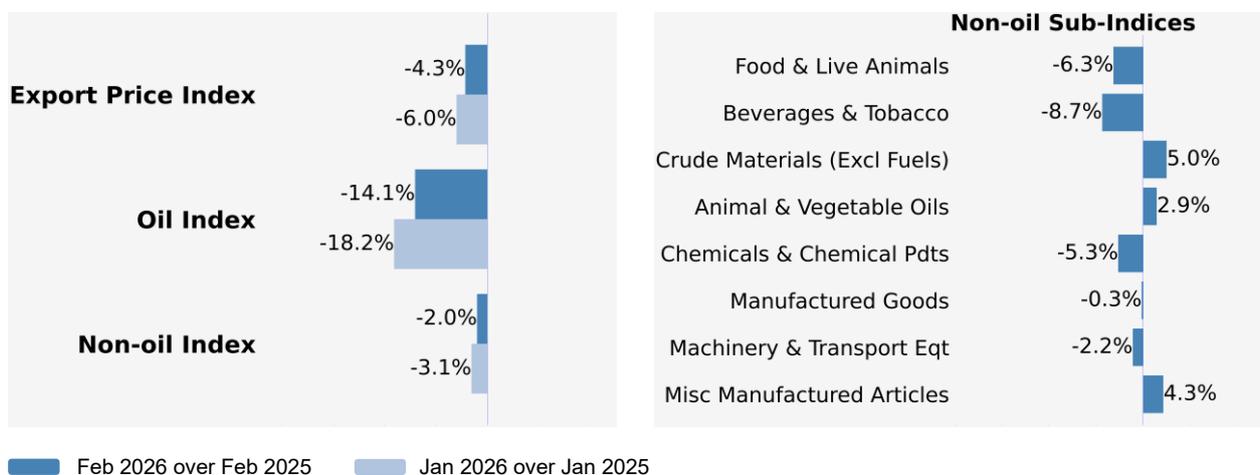

Month-on-Month Change

The Export Price Index rose 1.1% in February 2026, reversing the 0.4% decrease in January 2026. The Oil index gained 3.1%, mainly due to higher prices of petroleum and products, as compared to the 2.1% decrease in the previous month. The Non-oil index rose 0.7% in February 2026, after the 0.1% decrease in January 2026.

The increase in the Non-oil index was due to the Machinery & Transport Equipment, Miscellaneous Manufactured Articles, Chemicals & Chemical Products, Beverages & Tobacco and Crude Materials indices. The increases were partially offset by decreases in the Food & Live Animals, Manufactured Goods and Animal & Vegetable Oils indices.

Year-on-Year Change

The Export Price Index fell 4.3% in February 2026 from a year ago, following the 6.0% decrease in January 2026. The Oil index dropped 14.1%, mainly due to lower prices of petroleum and products, while the Non-oil index slipped 2.0%.

Among the Non-oil sub-indices, decreases were due to the Machinery & Transport Equipment index, attributed to lower prices of electrical machinery apparatus, as well as the Chemicals & Chemical Products, Food & Live Animals, Beverages & Tobacco and Manufactured Goods indices. The decreases were partially moderated by increases in the Miscellaneous Manufactured Articles, Crude Materials and Animal & Vegetable Oils indices.

Technical Note

The **Import Price Index (IPI)** is used primarily as an indicator to track the price trends of imported goods into Singapore. Prices of imports, valued at CIF terms (cost, insurance and freight) are obtained monthly from major importers. The weighting pattern of the index is derived from import statistics for 2023.

The **Export Price Index (EPI)** measures changes in the price of all exports of merchandise from Singapore, including re-exports. In general, prices are obtained from major exporters of the selected commodities. Prices used in the index computation, are the prices of goods that physically leave Singapore's main ports of export; also termed as Free on Board (FOB) prices. The weights of the index are derived from the distribution of export by commodity in 2023.

The IPI and EPI have consistently recorded response rates of about 80% respectively for each reference month, based on total import and export values of all selected commodities where price data could be collected from surveys and administrative sources.

Index Formula

The 2023-based series is compiled using the Laspeyres formula where the price and weight reference periods are aligned to the year 2023. The geometric mean formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

Measurement of Changes in Price Indices

Change over previous month compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements.

Change over same period of previous year measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

Linking the Old 2018-Based Price Index Series to the New 2023-Based Price Index Series

The IPI and EPI have been rebased from base year 2018 to base year 2023. To facilitate comparison of the historical price indices across base years, the old 2018-based series are linked to the new 2023-based series by re-scaling them via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2023-based index in 2023 to the annual 2018-based index in 2023.

Example: Linking the old Iron & Steel Index series for IPI prior to 2023, to the 2023-based Iron & Steel Index (2023=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2018=100)	Iron & Steel Index (2023=100)	Linked Coefficient
2023	117.2	100.0	$100.0 \div 117.2 = 0.853$

2) Re-scaling the old series to the 2023-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2018=100)	Iron & Steel Index (2023=100)
2021	Dec	130.3	$130.3 \times 0.853 = 111.1$
2022	Jan	128.7	$128.7 \times 0.853 = 109.8$

Rescaling the 2023-Based Index Series to Previous Years

To continue the old index series going forward in time, re-scale the new 2023-based index series to the old base year level, via a Rescaling Coefficient. The Rescaling Coefficient is the ratio of the annual 2023-based index in 2023 to the annual 2023-based index in the old base year.

Example: Rescaling the new 2023-based Iron & Steel Index series for IPI to the 2018-based Iron & Steel Index (2018=100)

1) Calculate the rescaling coefficient

Base Year	Annual Iron & Steel Index in 2023	Annual Iron & Steel Index in 2018	Linked Coefficient
2023	100.0	85.3	$100.0 \div 85.3 = 1.172$

2) Re-scaling the new series to the 2018-based series using the Rescaling Coefficient

Year	Month	Iron & Steel Index (2023=100)	Iron & Steel Index (2018=100)
2024	Jan	95.6	$95.6 \times 1.172 = 112.0$
2024	Feb	95.3	$95.3 \times 1.172 = 111.7$

Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

Dissemination of Data

The Import and Export Price Indices are available on the SingStat Website (<https://tablebuilder.singstat.gov.sg/>).

For more information about the indices, please refer to the [Catalogue of Products](#) in Page 12.

SINGAPORE DEPARTMENT OF STATISTICS COMMUNICATIONS & INFORMATION SERVICES

The Singapore Department of Statistics (DOS) offers official statistics, data insights, visualisations, and statistical resources through user-friendly platforms.

SingStat Website

Visit this convenient gateway to access latest data and statistical information.

Data across the six major themes of Economy & Prices, Industry, Trade & Investment, Population, Households, and Society covering some 200 topics such as Gross Domestic Product, Consumer Price Index, Retail Sales and Food & Beverage Services Indices, Producer Price Indices, Business Expectations, Business Receipts Index, Trade in Services, Direct Investment, Population Indicators, Household Income, Household Expenditure, Deaths and Life Expectancy, Births and Fertility, Marriages and Divorces, and more.

Publications

- **Statistics Singapore Newsletter** - features articles on latest key statistical activities, recent survey findings, and methodological improvements.
- **Information Papers** - highlight conceptual and methodological changes and improvements in official statistics.
- **Occasional Papers** - present statistical trends and observations on important social and economic issues to stimulate discussion and research.
- **Singapore in Figures** - allows exploration of key economic and socio-demographic statistics through interactive dashboards.

Visualisations such as infographics and interactive dashboards with latest data, and videos to explain data and statistical concepts.

Businesses Insights Tool for Enterprises (BITE) serves businesses with bite-sized data for big decisions, giving firms insights on their customers, industries, and business performance.

Advance Release Calendar with dates of upcoming data and publication releases in the next twelve months.

SingStat Table Builder

Access some 2,400 data tables for free across various economic and socio-demographic domains from 70 public sector agencies. Watch the [video](#) to find out how you can easily access and customise data tables.

SANDRA (Statistics AND Data Retrieval A.I. Assistant)

Chat with SANDRA on your data enquiries. Watch the [video](#) to find out how SANDRA can assist you in finding the data you need.

SingStat Express

Subscribe to receive alerts on the latest press releases, occasional/ information papers, and newsletters.

SingStat Mobile App

Download the app for fast and convenient access to commonly used statistics from your mobile devices.

Over 300 charts are available across over 40 data categories for easy access to visualise data trends.

For statistical enquiries, you may reach us at:

✉ email: info@singstat.gov.sg or submit the [Data Request Form](#)

☎ phone: 1800-323 8118* (Local users) or (65) 6332 7738 (Overseas users)

* Calls from mobile telephone lines to 1800 local toll-free number may be subject to mobile airtime charges as imposed by the relevant mobile service provider.
